URL: <https://www.data-legos.com/> Title: Data Legos Content: Welcome Welcome to DataLegos,Where Connections Create Clarity Unlock the Power of Your Data with Graph Intelligence At DataLegos, we donât just analyze dataâwe reveal its hidden connections. For over a decade, weâve pioneered graph and AI consulting to transform fragmented information into actionable insights, empowering businesses to outthink complexity and outpace competition. Why Choose DataLegos? Decades of Expertise, Future-Focused Innovation Our team blends PhD-level graph science, battle-tested business acumen, and cutting-edge AI to deliver bespoke solutions. From fraud detection to operational intelligence, we turn data into your most strategic asset. Vendor-Neutral, Value-Driven No one-size-fits-all tools. We architect solutions using the best-fit technologies for your unique needsâwhether itâs Neo4j, machine learning models, or cloud-native DevOps ecosystems. From Ideation to Impact Weâre more than consultantsâweâre innovation partners. Our end-to-end approach spans: Strategic Consulting: Align graph strategies with business goals Advanced Development: Scalable knowledge graphs, predictive AI models, and intuitive dashboards Domain Mastery: Proven success in fraud analysis, marketing optimization, anti-terrorism, and large-scale knowledge management Industries We Revolutionize ð Finance: Unmask hidden fraud patterns ð Healthcare: Map patient journeys for precision care ð Retail: Fuel hyper-personalized marketing ð Logistics: Optimize global supply chains ð Startups: Accelerate growth with graph-powered MVPs Welcome DataLegos Assistant Hello! I'm your DataLegos assistant. How can I help you today?

URL: <https://www.data-legos.com/about.html> Title: Data Legos Content: Leadership Meet the visionary leaders driving Data-legos forward Ravi Kiran Ponduri (Raki) Founder & Managing Principal, Graph Innovation Lead Ravi Kiran Ponduri (Raki) is a seasoned data engineering strategist and graph technology evangelist with over 25 years of experience in architecting enterprise-scale data solutions. As the driving force behind Data-legos, he combines hands-on technical expertise with a visionary approach to empower organizations through Neo4j-powered knowledge graphs and talent-centric innovation. Key Highlights Graph Technology Pioneer: Neo4j-certified architect with a decade of experience designing graph-driven solutions for Fortune 500 clients, startups, and government agencies. Full-Cycle Leadership: Built Data-legos from inception into a trusted Neo4j consulting partner, overseeing end-to-end delivery of 50+ knowledge graph deployments. Cross-Industry Impact: Delivered transformative results in healthcare (patient journey mapping), logistics (supply chain optimization), and fintech (AML/fraud detection). Community Catalyst: Mentor for early-career engineers and advocate for graph literacy through workshops, hackathons, and open-source contributions. âData isnât just about storageâitâs about storytelling. At Data-legos, we turn disconnected data points into decision-ready narratives, empowering businesses and talent alike to thrive in the connected economy.â Ashwin Pingali Chief Technology Advisor Ashwin Pingali is a visionary technology leader with over 30 years of expertise in Gen AI, data engineering, graph database architecture, and enterprise-scale knowledge graph deployments. As the guiding force behind Data-legos, he combines deep technical mastery of Neo4j with a passion for mentoring the next generation of data professionals.

Key Highlights Neo4j Authority: Proven track record of designing and optimizing ERP, GEN AI, graph-powered solutions for Fortune 500 companies, startups, private and public-sector organizations. Enterprise Impact: Led cross-functional teams to deliver mission-critical projects in fraud detection, supply chain optimization, and real-time recommendation engines across industries like finance, healthcare, and logistics. Open Source Advocate: Contributor to graph technology communities and co-author of industry whitepapers on scalable knowledge graph architectures. âData is only as powerful as the connections it reveals. At Data-legos, we donât just build graphs â we engineer decision-making ecosystems that turn complexity into clarity.â Harikrishna Gudladona Director of Client Solutions & Strategic Success Harikrishna Gudladona is a client-centric leader with over a decade of experience driving digital transformation. As the architect of client success at DataLegos, he specializes in translating complex business challenges into scalable solutions while fostering long-term partnerships grounded in trust and measurable outcomes. Key Highlights Client Advocacy Expert: Orchestrated 50+ enterprise-grade deployments across healthcare, retail, and logistics, maintaining a 95% client retention rate through tailored roadmaps. End-to-End Delivery: Leads cross-functional teams in designing and implementing solutions that align with client KPIs, from initial strategy to post-deployment optimization. Ecosystem Mastery: Expertise in governance models, change management, and ROI-focused use case prioritization. Talent Multiplier: Mentor for DataLegos' Career Catalyst program, bridging client needs with emerging engineering talent.

â True partnership means walking the journey together â not just delivering solutions, but unlocking our clientsâ capacity to innovate.â P V Prasad Director of Operational Excellence & Strategic Enablement P V Prasad is a results-driven operations leader with 15+ years of expertise in scaling technology consultancies through process innovation, resource optimization, and cross-functional alignment. As the backbone of DataLegos' internal engine, he ensures seamless delivery of graph solutions by harmonizing talent, tools, and workflows across global teams. Key Highlights Operational Architect: Designed and implemented agile frameworks that reduced project delivery timelines by 25% while maintaining 99.9% client SLA compliance. Resource Orchestration: Master of balancing technical talent allocation, vendor partnerships, and infrastructure scaling to support 50+ concurrent deployments. Cost Optimization Pioneer: Drove 30% reduction in operational overhead through automation of billing, procurement, and compliance workflows. Talent Multiplier: Built DataLegos' hybrid work model and career progression pathways, contributing to 90% employee retention in high-growth phases. "Operations isn't about control - it's about creating environments where innovation thrives. Our internal excellence directly fuels our clients' external success." Our Team Meet the talented professionals driving innovation at Data-legos Gokul Raj HR Operations & Growth Coordinator Sumanth Gadepalli AI/ML Research & Systems Engineer Vishnu Mohan J AI Agentic Systems Engineer (Full Stack UI/UX & Backend) Naveen Gunapaneni AI/ML Platform Operations Engineer (AI DevOps, MLOps, compliance) Sai Sathwik G Quality & Automation Strategist â Lead Generationâ Specialist DataLegos Assistant Hello! I'm your DataLegos assistant. How can I help you today?.

URL: <https://www.data-legos.com/services.html> Title: Data Legos | Services & Expertise Content: Modern Data Engineering & AI Solutions Empowering with advanced graph, AI, and data engineering services. Unlock insights, automate workflows, and accelerate innovation with Data Legos. Neo4j Graph Database Solutions We help organizations unlock the full potential of their data by integrating it into a cohesive graph structure. This enables businesses to uncover hidden patterns, enhance decision-making, and drive strategic growth. Graph Data Modeling: Design optimal graph schemas for performance & flexibility Neo4j Implementation: End-to-end development using Cypher and Neo4j APIs POC & MVP Development: Build prototypes and minimum viable graph products Graph Migrations: Move from RDBMS or other graph DBs to Neo4j seamlessly Graph Algorithms & Analytics: Apply PageRank, Community Detection, etc. Production Deployment & CI/CD: Automate release cycles for graph systems Performance Tuning & Query Optimization: Improve speed and scale of Cypher queries Neo4j Training & Enablement: Upskill teams on Neo4j fundamentals and advanced usage Visualization Tools Integration: Deploy NeoDash, Bloom, or custom visualizations Solution Audits: Review existing graph systems for architecture and performance Data Engineering Solutions Transform raw data into actionable insights with pipelines and Observability on the pipelines. ETL/ELT Pipeline Development: Using Python, Apache Airflow, or Databricks Data Lake & Warehouse Integration: Connect Neo4j, S3, Redshift, BigQuery, etc.

API-based Data Ingestion: Real-time or batch pipelines using REST/GraphQL Data Quality & Validation Frameworks: Build trustable data assets Cloud-Native Pipelines: AWS Lambda, Glue, S3, Step Functions orchestration Custom Python Data Services: From data loaders to transformers and enrichment scripts Streaming with Kafka or Pub/Sub: Stream updates to and from graph systems Graph + Tabular Fusion: Combine structured and connected data for ML readiness DevOps & Infrastructure Setup: Terraform, Docker, CI/CD for data workflows Monitoring & Observability: Build dashboards for data flow, latency, and failure tracking AI-Driven Data Analytics

Transform raw data into actionable insights with pipelines and Observability on the pipelines. AI Chatbot Development: Build OpenAI-based chat experiences with Flowise, Botpress, or Make Workflow Automation (Make/Zapier): Automate business tasks, reporting, notifications LLM Integration & Prompt Workflows: Connect GPT models with Airtable, Slack, CRMs RAG Pipeline Setup: Retrieve + generate systems with vector DBs (e.g., Neo4j, Pinecone) Custom Internal Apps (Retool/Glide/Softr): Dashboards, CRUD apps, AI-powered interfaces Voice/Email Automation Agents: Build AI agents that speak, respond, and summarize LLM POCs and Productization: Prototype and deploy AI flows quickly No-Code Data Products: Rapid MVPs with tools like Bubble, Webflow + AI APIs Training & Consulting: Upskill business teams on no-code AI possibilities Talent Development Initiatives Career Catalyst Program: We support local talent by offering the "Career Catalyst" program for computer science graduates. This initiative provides real-world experience and software engineering skills, helping students complete their final projects while gaining valuable industry insights. Empower local computer science talent through real-world data engineering projects and mentorship. Bridge academia and industry with s/w engineering skills tailored for job readiness.

For comprehensive program details, please visit our dedicated page: [Career Catalyst Information](#). Ready to transform your data journey? Contact our India-based team for a free consultation and discover how Data Legos can accelerate your business growth. Get in Touch DataLegos Assistant Hello! I'm your DataLegos assistant. How can I help you today?.

Learn, Build, Lead. Enroll Now A 12-week project-based roadmap across three focused streams â Data Engineering, AI Automation (No-Code/Low-Code), and AI/LLM & RAG. Students graduate with deployable projects, portfolio-ready case studies, and job-ready skills. ð Data Engineering Python, ETL pipelines, PySpark Databases & Data Modeling (SQL) Cloud basics (AWS/Azure) + Git/CI ð AI Automation No-code platforms (n8n, Zapier), Webhooks Document automation & chat/email bots AI integrations & agentic workflows ð AI, LLM & RAG Prompt engineering, RAG pipelines Vector search (FAISS/Pinecone) & Neo4j LangChain agents, safety & multilingual AI 12-Week Roadmap Week 1Discover & DefineProblem Identification, Career Goal Alignment. Week 2High-Level DesignDesign Thinking, Workflow, Planning. Week 3Tech Stack & ResearchTechnology Evaluation, GitHub repo. Week 4Low-Level Design & SetupSystem Design, Version Control. Week 5Development Sprint-1Agile Scrum Standups, n8n Workflows. Week 6Development Sprint-2API usage, Basic error handling and logging. Week 7Data Processing/Automation logicPython Pandas, Numpy, SQL lite. Week 8Testing & ValidationQA Practices, Continuous Testing. Week 9Documentation & FeedbackWriting for Technical Audiences, Review loop with Mentors. Week 10Polish & Final BuildDeployment Checklist, Code Refactoring. Week 11Presentaiton & Social PublishingTech StoryTelling, Brand Building. Week 12Mock Interviews & Exit ReviewCareer Readiness, Reflective learning. Career Readiness Resume & LinkedIn project writeups Mock interviews & role alignment Project publishing & personal branding Build AI + Start-up Mindset Prompt Driven Development AI First Approach Deliver Value Program Flyers Explore our comprehensive details on internship.

Welcome to DataLegos Your gateway to AI excellence and career transformation CCI@DL-12 Week Road Map Navigate your journey from learning to leading in AI CCI@DL-Projects Streams

and Topics Explore the diverse projects and topics covered in our internship program. Future with AI The software world is evolving ■■■ AI is no longer optional. Bridging the AI Readiness Gap Adapt. Upskill. Thrive in the AI Era. Internship Details Watch our teaching style. Program Introduction Welcome to CCI@DL - Your journey to AI mastery begins here Internship Structure Learn about the key components of our internship program. Why Join CCI@DL? Real-World Projects Work on actual industry challenges and build a portfolio that showcases your skills to potential employers. Expert Mentorship Learn directly from industry veterans with over a decade of experience in AI and data science. Industry Certification Earn recognized certifications that validate your expertise and enhance your career prospects. Cutting-Edge Curriculum Stay ahead of the curve with our constantly updated courses that reflect the latest industry trends and technologies. Join the Program Fill out the form below to register your interest Full Name Email Address Phone Number Why do you want to join CCI@DL? Submit Application Thank you for your application! We will get back to you soon. Frequently Asked Questions What is CCI@DL? CCI@DL is an innovative training program by DataLegos that focuses on building careers in AI and data science through hands-on learning and real-world projects. How can I enroll in the program? You can enroll by clicking the "Enroll Now" button on our website and filling out the registration form. Our team will review your application and get back to you with the next steps. What is the duration of the program? The duration varies depending on the specific program and your chosen pace. Generally, our programs range from a few weeks to several months.

Do I need any prior experience in AI or data science? No prior experience is necessary. Our programs are designed for individuals at all skill levels, from beginners to advanced practitioners. Will I receive a certificate upon completion? Yes, all participants who complete the program will receive a certificate from DataLegos, recognizing their new skills and knowledge in AI and data science. × DataLegos Assistant Hello! I'm your DataLegos assistant. How can I help you today?.
